Professional Summary

Aspiring backend developer with hands-on experience in C#, .NET, and SQL, specializing in building scalable, high-performance server-side applications. Currently advancing skills through ALX Back End ProDev program, mastering Python, JavaScript, and advanced SQL techniques for scalable server-side development. Proficient in designing APIs, integrating databases, and implementing efficient backend logic. A strong problem solver with experience in developing and implementing complex algorithms, eager to learn, contribute to collaborative teams, and deliver reliable backend solutions.

Relevant Experience

Software Development Intern/Trainee, Leizam Ventures Limited, Kiambu

01/2025 - 05/2025

- 3-month internship with 2-month learning continuation and project involvement
- Developed and implemented complex algorithms for software applications using C# and ASP.NET
- Performed extensive debugging and troubleshooting of intricate code to resolve technical issues.
- Applied analytical problem-solving approach to optimize database interactions and system performance.
- Collaborated with engineering team members on challenging technical problems requiring methodical solutions.
- Gained proficiency in software architecture principles and systematic debugging methodologies.

Education

Machine Learning & Data Science, Tech Expert Academy

11/2023 - 04/2024

Completed a comprehensive Machine Learning and Data Science course at Tech Expert Academy, including an Azure Cloud Data Track, where I gained practical experience in applying advanced data analysis techniques and machine learning algorithms. My coursework provided proficiency in Python, data manipulation with Pandas and NumPy, machine learning with Scikit-learn and TensorFlow, and data visualization with Matplotlib and Seaborn. I also have experience in deploying machine learning models on Microsoft Azure and using version control systems like Git and GitHub.

Back End ProDev Program, ALX, Online

06/2025 - Present

Currently enrolled in the ALX ProDev Backend Program, focusing on building robust and scalable backend systems using Python and Django REST Framework. Gaining hands-on experience in API development, JWT authentication, custom permissions, database design with SQL, and deploying containerized applications using Docker and Kubernetes. Developing expertise in architectural patterns, testing, and best practices for enterprise-level backend development.

Skill Enhancement Program, JKUAT & Leizam Ventures LTD, Kiambu

09/2024 - 12/2024

- Completed a 12-week project-based apprenticeship in web development using ASP.NET and C#.

- Collaborated with industry professionals and JKUAT alumni developers.
- Gained hands-on experience in software development methodologies.
- Strengthened problem-solving skills in building dynamic web applications and integrating databases.

**Bachelor of Science in Mathematics and Computer Science,
Jomo Kenyatta University of Agriculture and Technology, Kiambu**

09/2019 - 06/2024

Second Class Honours

(Upper Division)

Secondary Education, Moi Secondary School, Amalo, Nakuru

02/2015 - 11/2018

Attained B+ (68 Points)

Primary Education, Ebenezer Daystar Academy, Nakuru

12/2014

Attained 336 Marks
